

Snowfall on red rock

Cinematic but calm. Black and white carry the page, ice holds the structure, cold clay marks only where the eye should land.

What the measurements say

One sans, pushed to extremes

Megha: Inter 128px, ~10.24px tracking. Melvin: 142px, ~2.85px. Sousali: 205px, ~6.15px. Body stays 14–16px.

MEASURED

A serif only as an accent

Paco: Newsreader italic for the tagline only. Shu Ding: italic serif nav beside a sans bio. Practical Typography is the all-serif outlier.

MEASURED

One loud accent, used rarely

Megha #ff0048 on the subtitle only. Porsche #e00000. Sousali runs five (#e84855, #c2ec40, #f04c8a...), which is why it reads loud.

MEASURED

Narrow text column

Paco: ~content-width 640px inside --page-width 1072px. Shu Ding: 16px body at 28px line-height (1.75).

MEASURED

Never pure black or white

Darks: #1a1a1a, #0f0f0f, #010205, #150734. Lights: #ededed, #fcfcfc, #e6e6e6. Shu Ding's body text is slate #4a515b, not black.

MEASURED

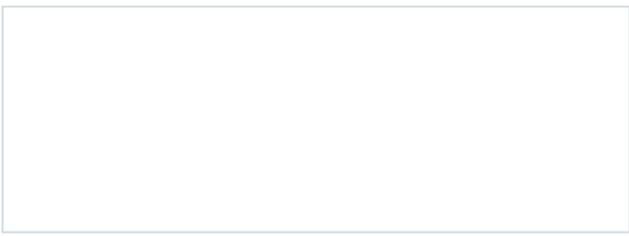

Entrances cost seconds

Paco, Megha and Melvin showed a blank page for about 3–6 s while the entrance played. On 3G that blank is the first impression.

Mostly black. The ice and the clay are not paint on the page: they are the light falling into it, cold rays through a warm haze.

Three light studies

Icy rays only

Cold, clean, closest to snowfall at night. Frost at about 13% alpha.

Clay haze only

Red rock at dawn. Warm, but it reads as desert, not snow.

Icy rays through clay haze

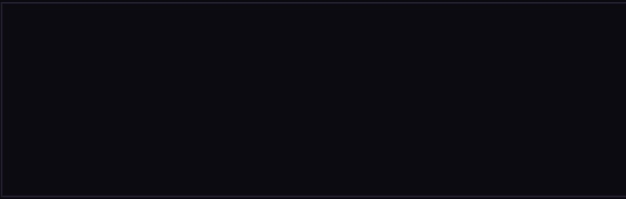

Your "snow in the desert": the clay is the source glow, the ice is the rays.

Ray FROST 13%
God rays only, never a fill

CLAY · WARM LIGHT

Red rock #B88478
The one solid accent: links, one numeral (6.2:1)

Frosted clay #E3D3D0
Hover bloom, selection, focus (13.5:1)

Haze RED ROCK 42%
Source glow behind the rays

Cold clay #8E5A4F
Haze tint only, fails as text (3.5:1)

Rule: black is the page. Text is frost and ice. Colour arrives only as light: rays, glows, a hover bloom. Red rock is the one solid accent (links, one numeral). Cold clay #8e5a4f fails on black (3.5:1), so it lives only inside the haze.
